

Radio Technology Somfy® (RTS)

StruXure has partnered with Somfy to offer an exclusive platform which enables users to control their Pivot system through a variety of different control options, such as hand held remote, wireless wall switches mobile devices, timers and sensors. With a simple push of the button, a radio wave signal is sent to move the louvers with ease. There is no need to point or aim the remote because RTS is omnidirectional and operates within a range of 60'

Control Modules

Each Somfy control module can control up to 2 zones, with a maximum of 3 modules per control box. Each control box can operate up to 6 zones. Once you get beyond 6 zones, you will receive a 2nd control box which can be placed adjacent to or in a completely different area than the first control box.

- 1-2 Zones
- 3-4 Zones
- 5-6 Zones

Rain Sensor

Somfy offers a wireless rain sensor that requires no wiring from the sensor to the box. It is solar powered and needs no power supply. It can be placed in any location within range of the control box.

Wind Sensor

Somfy offers a wireless wind sensor that requires no wiring from the sensor to the box. The wind sensor requires a 110-power supply (comes with a 15' cord) and can be placed in any location within range of the control box. It can also be wired directly to the control box for 24-volt DC low voltage installations.

Remote Control

Somfy 5-channel patio remote is damp rated for outdoor use. 5-channels provides the ability to control multiple zones independently or use channel 5 to operate in sync. Program and control motorized screens that are powered by Somfy motors.

1-Channel Wireless Wall Switch

Somfy offers a single channel wireless wall switch for simple directional operation of the louvers. Operates a single zone or all zones in sync with an 'open' or 'close' control. Easy surface mount Installation with no electrician required. Powered by a lithium battery.

5-Channel Wireless Wall Switch

Somfy offers a multi-channel wireless wall switch to provide control of multiple zones independently or use channel 5 to operate in sync. Program and control motorized screens that are powered by Somfy motors. Can be easily mounted indoors near the space next to an existing light switch or cut into the drywall (box included) with no electrician required. Powered by a lithium battery.

Somfy myLink™

Somfy myLink™ is a simple plug in interface that turns your smart phone or tablet into a sophisticated Remote to operate your system through RTS whether you are home or not. Combines all the benefits of a Somfy hand held remote along with timers in a convenient app.

Somfy myLink™ offers 16 channels to provide individual control, schedules, scenes and timed events. Compliments existing control devices such as hand held remote or wireless wall switches and sensors. It allows you integrate with Amazon Alexa for voice commands, as well as integration into most Home Automation systems, including Control4, Crestron, Savant, Elan, RTI, URC Brilliant Tech and others.

Linear Actuator

Somfy linear actuator is a sleek, state-of-the art motor assembly that powers our system. No longer Color matched, the matte silver finish deflects heat and stays cooler for consistent operation in all weather conditions. Comes with a 5-year full warranty.

MYLINK™ BENEFIT OVERVIEW:

Comfort & Convenience

- Improved range of operation using RF instead of Bluetooth.
- Use a smartphone or tablet to operate up to 16-channels of motorized products whether home or away.
- Create different scenes that incorporate a variety of motorized products across different channels.
- Use natural voice commands to control RTS by adding **myLink™**

Connected Living

- Always have control of your motorized applications regardless of where you are.
- Compatible with [Control4](#), [Crestron](#), [Savant](#), Elan, RTI, URC Brilliant Tech and others.
- Control Somfy-powered solutions with any Alexa-enabled or Google Home device.

Timer

- Schedule timed events to automatically operate motorized products to reduce heat gain/loss.

Compatibility

- Compatible with all Somfy RTS motors and receivers.
